W. POXON & SON, Props.

NEW WHEAT GRADES NO. 1. WEIGHING HIGH AS 62 LBS

The new wheat is beginning to come into the elevators and most of it so far, from latest reports, is grading No. 1 and a great deal of it is weighing as high as 62 pounds to the bushel with practically no dockage. The average yield is about 16 bushels to the acre.

LITTLE ITEMS OF LOCAL INTEREST

Mr. and Mrs. J.H. Oliphant and family returned on Monday from a few days visit in Edmonton.

Mr. and Mrs. L. Poxon and son returned last Friday after spending a couple of weeks visiting at Beaver Lodge, the guests of Mr. and Mrs. H. Bruehl.

C. H. Nash is having a foundation put under the old post office building and as soon as this work is finished R. C. Barr intends to move in and in future the building will house the Carbon Bakery.

Mr. and Mrs. S.F. Torrance and family returned on Monday after spending a few of days holiday at Banff.

Miss Livingstone, of Olds, is visiting at the home of Mr. and Mrs. H. A. English.

Mr. and Mrs. B. E. Joyce of Preeceville, Sask. were Carbon visitors on Wednesday last.

Yesterday afternoon was the last of the Wednesday half holidays for this year and commencing next week the stores will remain open all day on Wednesday.

Jim Ramsay and D. McKinnon are building an ante room and doing other repairs to the old pool room building. This place has been leased by the Carbon Elks Lodge and will be used as a club room in future.

LOST—Pair of pliers, 50c reward. Apply to Garrett's Garage.

W. Edwards of the Bank of Montreal staff is on his holidays.

Keep in mind the Elks Free Picnic on Monday next. Also remember the big dance that evening with Calgary Elks music.

THE ELKS PICNIC

Weather permitting the Elks free picnic on Monday, Sept. 2nd, promises to be even better than last year and nearly all arrangements have been made to give the kiddies of Carbon and district the best time that they possibly can have and everything will be free to them. Ice cream, pop corn, candy, etc. Patrons are asked to bear in mind that they are to have their picnic hamper ready by one o'clock on Monday and a truck will call around town and gather them up. Those from the country are asked to bring their basket to the cutting rink as soon as they arrive. In this way the Elks hope to make arrangements to have everyone seated together and to give them a jolly time.

Are you all ready for Monday? See the bills for the program.

DECISION SUSTAINED WHEN APPEAL HEARD

Erland Johnson, well-known farmer of the Carbon district, who was sentenced to ten days in jail by Magistrate O'Connor in the fall of the year on a charge of being intoxicated while in charge of an automobile, will be called upon to serve his term unless an appeal to a higher court is filed as Judge Mahaffy sustained the magistrate's decision at a district court hearing held at the Drumheller court room last Friday—Drumheller Mail.

RAILWAY AGENT TO KEEP ORDER BOOK OPENED

CARBON SCHOOL FAIR THURSDAY, SEPTEMBER 5

The Carbon School Fair will be held in Carbon next Thursday, September 5th and the executive committee hope to put over one of the best fairs ever held in Carbon in spite of the dry year and the fact that harvest is in full swing. If any child has exhibits to prepare now is the time to begin. The exhibits will be in the curling rink and the old school and all exhibits must be in by 10 o'clock Thursday morning. Everybody is welcome so let's all turn out and see just what the children are doing at the school fair. There is just one week in which to have everything completed.

Tennis Notes

The final in the Ladies' Doubles of the Carbon Lawn Tennis Club was played on Saturday, August 24th and resulted in a win for Miss K. Ramsay and Miss A. Fraser who defeated Mrs. Peters and Miss Ruth Ramsay with the scores of 6-3, 2-6, 6-1. The play was most interesting, the winners having to work hard for every point, and the many rallies were greatly enjoyed by the spectators. Carbon is to be congratulated on the great improvement shown by their lady tennis players this season and we understand that a number of our ladies intend to enter the Drumheller open tournament on September 1st.

MATCH AT DRUMHELLER

The Drumheller and Carbon Lawn Tennis Clubs played the return match at Drumheller on August 25th, in the inter-club competition of District 6, of the Alberta Lawn Tennis Association. The result was a win for Drumheller in every event, but the match was greatly enjoyed by the visiting players, who were glad to have the opportunity of competing against the strong Drumheller club. The following are the results and scores.

Men's Singles—W. Code of Drumheller defeated H. Longstaff, Carbon, 7-5, 6-1.

S. Hayden of Drumheller defeated L. Poxon of Carbon, 6-0, 6-3.

Ladies' Singles—Miss M. Connelly of Drumheller defeated Miss K. Ramsay of Carbon 6-0, 6-4.

Men's Junior Singles—E. Code of Drumheller defeated W. Poxon of Carbon 6-4, 6-3.

Ladies' Junior Singles—Miss A. Davis of Drumheller defeated Miss M. James of Carbon, 6-1, 6-3.

Men's Doubles—W. Code and S. Hayden of Drumheller defeated H. Longstaff and L. Poxon of Carbon, 6-2, 6-2.

C. McLeod and T. Anderson, Drumheller defeated H. Brown and W. A. Braisher Jr. of Carbon, 8-6, 6-2.

Ladies' Doubles—Miss A. Davis and Miss B. Stephenson of Drumheller defeated Mrs. Laing and Miss Braisher of Carbon, 6-1, 6-1.

Mixed Doubles—C. McLeod and Miss B. Stephenson of Drumheller defeated H. Brown and Miss M. Ramsay of Carbon 6-3, 6-3.

After the match the Carbon players were entertained to dinner at the White House Hotel by the Drumheller Lawn Tennis Club.

A fine specimen of petrified fish was found near Youngstown recently and it has been placed in the Calgary museum.

Harvesting is in full swing in the Nanton district and the combined grain is grading no. 2 and 3. There is no difficulty in getting harvesters and the average wage being paid is \$3.50 per day.

The Alberta Wheat Pool has been calling the attention of its members to important changes in the Canada Grain Act which were made at the last session of Parliament.

It is mentioned that a new feature in marketing wheat this year is contained in the requirements of the regulations governing Car Order Book. This year all agents of railway companies are required to keep open a Car Order Book. The only method of obtaining a car is for the grain producer to have his name placed in this book either by himself or by his agent duly appointed in writing.

Under the old system it was not compulsory for an agent to open a Car Order Book unless requested to do so. Furthermore, it was a common practise for one individual to act as agent for many growers of grain. Under the new regulations no one can act as agent for more than one person at a time. It is hoped by this method to overcome the weakness of the old proxy system.

Each signer is given a car in turn, and the Railway agent must notify the applicant when the car is available for him. The applicant is then given three hours within which to declare his intention and ability to load the car, and a further time allowance of 24 hours is given within which to load. If the applicant cannot load the car it goes to the next name on the list who ordered a car of that capacity.

Agents of elevator companies must sign for cars in the same manner as the grain producers, and are treated the same, except that they are allowed two cars as compared with one of the farmer. This is to allow elevator companies to ship their accumulations of street wheat.

It is not necessary for a grain producer to have his grain in the elevator when he signs the Car Order book, but it is wise for him to have all plans made in order to anticipate his turn, so that he can load his car within the required time.

NEWS OF ALBERTA

Work has started on the excavation for the new Elks Hall at Drumheller. Tenders are being called for the building.

Cutting is general throughout the Three Hills district and yields are reported from 2 to 30 bushels per acre.

People of Carstairs are voting this week on a by-law to provide a new school in that town.

Gleichen is planning to build a covered rink at the cost of approximately \$10,000. The skating capacity will be about 1000 persons.

Twenty-seven events have been arranged for the first annual gala to be held at Drumheller this week at the community swimming pool.

According to an arrangement among the store keepers of Three Hills, the Wednesday half holiday is to be continued until the end of October.

Serious forest fires are raging near the Turner Valley oil fields and a close watch is being kept on the property.

The Donkhobors are again causing trouble at Nelson, B.C. and they have resisted police arrest.

Work on the Scott-Sambrooke airplane at Bassano has almost been finished and the amateur builders are now awaiting the arrival of the engine.

One of the worst tragedies ever to strike Hanna occurred at Buffalo Lake a few days ago when four local citizens were drowned.

A deer wandered down over the hills one night last week and was on the highway near Claresholm, when a blinding light of a motor car so confused it that the deer ran into the car and was killed.

The High Cost of Sickness

Ten billion dollars a year, or one-ninth of the annual income of the United States, goes in that country to pay for illness or to repair damages inflicted by it, according to one responsible authority quoted in a recent issue of "The Literary Digest."

It is doubtful if in Canada the necessary information is available and data compiled to enable an estimate to be made of the costs of sickness to the Dominion as a whole. Probably in this more northerly climate and less congested centres of population, sickness is not quite so prevalent, although, on the other hand, owing to the distance which many of our rural population are from doctors, hospitals and nurses, the average cost per patient may be somewhat higher than across the line.

Some of the figures quoted by "The Literary Digest" as applicable to the United States may, therefore, be not so very far out in their relation to Canada. At all events, they are arresting and thought provoking.

It is stated that the average individual between the cradle and the grave spends one-fortieth of his time in bed because of incapacitating illness, and that for the same reason the average worker loses two per cent. of his time, or a fraction more than seven days a year.

The people of the United States, it is asserted, are paying for the treatment of disease not less than \$2,500,000,000 a year, or approximately \$100 per family. In addition there is an estimated annual loss of \$2,000,000,000 as a result of decreased wage-earning capacity. And there is a still further permanently interrupted wage-earning capacity through pestonable deaths, estimated to be \$6,000,000,000, making the total annual cost of disease to the people of the United States, \$10,000,000,000. The total annual income of the country is about \$90,000,000,000.

Can any people afford to pay such a staggering sum, constituting, as it does, such a large proportion of their total income on such a non-productive, destructive thing as disease and preventable deaths? The United States census returns makes answer. According to this official compilation, 49.7 per cent. of patients in general hospitals, in 1923, were able to pay in full; 19.3 per cent. of patients paid in part, and 31 per cent. patients paid nothing. While no reliable data is available as to the extent that patients paid for the services of physicians, it is reasonable to suppose that physicians were paid at much the same ratio as the hospitals. If so, then only about one-half of the people paid in full for services required as a result of illness; 20 per cent. paid in part, while 30 per cent. paid nothing.

The conclusion reached is, that for the great mass of families with incomes below \$1,200 a year, there is only one of two alternatives when sickness overtakes them,—medical charity or financial tragedy.

The further conclusion is reached that there are just two ways for lowering the cost of medical care. One way is by the prevention of unnecessary disease,—certainly the best and sanest way,—and the other way is through the use of an organized medical service.

An organized medical service, it is pointed out, can be offered for financial returns considerably smaller than the cost would be if the patient obtained the same service from unrelated practitioners and specialists. An organized service makes possible economies which are not possible in an unorganized service. Certain examples are cited:

Through an organized medical service, some of the large universities are able to render a thoroughly modern medical service, including hospital care, to their students for from \$9 to \$12 per student a year.

The Endicott-Johnson Corporation with its 16,000 employees and their families represent a population of approximately 60,000 people. The Corporation gives these employees and their families a medical service which includes the full-time services of 27 physicians, 3 dentists, 1 X-ray technician, 51 nurses, and 2 pharmacists, for an annual cost of \$6 to \$7 per capita for the whole industrial population.

The industrial settlement of Roanoke Rapids, North Carolina, composed of workers of five cotton mills and one paper mill, gives a modern, efficient medical service, including hospital care, home visits, and public-health nursing, for \$23.60 per family, or at approximately \$9 per capita.

The insurance principle is urged as the remedy, and an effective one, for providing adequate medical care for a very large percentage of the people, and it is believed that insurance companies will, in time, embrace it as a part of their protective programme.

It is estimated that more than 1,000,000,000 stars have already been seen through powerful telescopes.

It is estimated that there are 44,000 thunder storms occurring daily on the earth.

Beauty may be merely skin deep, but it is nearly always effective.

The art of pottery dates back as far as we can trace the human race.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Canada Wild Life

Shipped To Ireland

Sent By Express To Zoological Gardens At Dublin

Noah's Ark on a small scale passed through Montreal recently in the form of a shipment of Canadian wild life on the way from Toronto to the Zoological Gardens, at Dublin, Ireland. This special shipment was handled by the Canadian National Express, the crates being transferred from Bonaventure Station to the SS. Lord Antrim, which carried bird and beast to the Irish Free State. The consignment consisted of two bears, one eagle, two woodchucks, two raccoons and four prairie dogs.

DO YOU VALUE HEALTH?

Sickness Almost Always Due To Weak, Watery Blood

If your health is poor; if you are pale, nervous and easily tired; if you suffer from headaches or backaches; if there are touches of indigestion, or twinges of rheumatism, you may depend upon it that these symptoms come from an impoverished condition of the blood, and that unless this condition is remedied a complete breakdown may follow. To any who are in this condition, Dr. Williams' Pink Pills will be found the perfect medicine. The whole mission of this medicine is to build up the blood, promote appetite and good digestion, and strengthen tired, frayed nerves. Men and women alike benefit through the use of this medicine. Therefore if you are weak or ailing, give Dr. Williams' Pink Pills a fair trial and you will be pleased with the beneficial results that will speedily follow.

Among the thousands who have found Dr. Williams' Pink Pills a real blessing is Mrs. Geo. M. Andrews, Halifax, N.S., who says:—"My first experience with Dr. Williams' Pink Pills was as an anemic young girl, when they completely restored my health. Then a few years ago I became pale and run down, and my husband got a supply of the pills for me. I gave them a good trial and when my baby was born she was a big healthy baby and I did not have a day's sickness. My friends all tell me how well I look and I certainly feel that way, and I give all the credit to Dr. Williams' Pink Pills. I hope my experience will help some other woman who needs a good medicine."

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Add New Export To Canada's List

British and German Dealers Repeat Order For Fresh Salmon

A new product has been added to the exports of Canada to Britain and Germany in the shape of fresh Gaspe salmon. A few weeks ago a trial shipment of fresh salmon, frozen by a new brine solution leaving the fish as fresh as when it was taken out of its native waters, was sent to British and German fish dealers, who were so pleased with the result, that an order for 25 tons soon followed. Many more orders are expected.

Choked For Air. Some little irritant becomes lodged in the bronchial tubes, others gather, and the awful choking of asthma results. Nothing offers quite such quick and positive relief as Dr. J. D. Kellogg's Asthma Remedy. The healing, soothing smoke or vapor penetrates, clears the passages and gives untold relief. It has behind it years of success. It is the sure remedy for every sufferer.

Due To Several Reasons

Never before has Saskatchewan been able to get through the work of the harvest season without help from the East. It will be possible this year for the first time because of the relatively small crop, use of labor saving machines such as combines, and the increase in western industrial population.

A Prime Dressing For Wounds.—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

Messages By Heliograph

Heliographs have been successfully used for the regular transmission of messages between Prince Albert, Saskatchewan, and a station in the Prince Albert National Park over a distance of 30 miles.

Keep Minard's Liniment always handy.

W. N. U. 1800

New British Liner

"Britannic" Of White Star Line Is Largest British Motorship

The twin-screw motor passenger liner "Britannic," built by Messrs. Harland & Wolff, Limited, for the White Star Line, has been successfully launched from the builder's North Yard, Belfast.

The "Britannic" is intended for the Liverpool-New York service of her owners, the White Star Line, and will be a notable addition to the White Star fleet, being the largest British motorship.

The accommodation provided for the 1,550 passengers (cabin, tourist, and third class), will set up a new standard on this route, noteworthy features being the swimming pool and tennis courts in the cabin class, and children's playrooms and elevators in the tourist and third class accommodation. The size of the "Britannic" has given ample opportunity for spacious planning and effortless design in the cabin class public rooms; and the impression of restricted space so common on board ship has been very effectively eliminated.

The cooking throughout the ship is carried out electrically, and this not only includes the main ranges but such supplementary appliances as grills, roasters, fish friers, salamanders, griddle plates and hot presses. In this connection the baker's oven, together with the oven in the confectioner's shop, is also electrically operated.

It is expected that the "Britannic" will be the most popular ship sailing out of the port of New York during the tourist season. Never before has the tourist of moderate means been so catered for by a steamship company, and the opinion of shipping men is that the White Star Line are to be congratulated on the effort they have made by means of the "Britannic" to cater to the tourist who cannot afford the money demanded for the first class ships, and it is felt that a cabin class ship, such as the "Britannic" will fill a very necessary place in the shipping life of New York.

Wireless For Chateau Laurier Hotel

Special wireless and broadcasting and receiving equipment in the Chateau Laurier Hotel, in Ottawa, make it possible for addresses delivered in one part of the hotel to be heard in other public rooms, or in private suites.

Minard's Liniment for Neuralgia.

Some desert plants contain water which travellers find useful in quenching their thirst.

By their works do we know them—the spongers.

SHIP YOUR GRAIN — TO — McBean Bros.

Crop conditions the world over appear to be unsatisfactory this year, so much so, that we consider higher prices warranted than those prevailing. It is our opinion, given after careful study of the world conditions, that our wheat should be worth today \$2.00 per bushel with considerably higher prices later on. Assuming that importing countries take \$30,000,000 bushels, which is a moderate estimate, as last year they took 227,000,000 bushels, and European crops this year are short of last, we have every indication of a shortage in supplies before another crop is harvested. For this reason we look for wheat to sell at \$2.25 per bushel, barley at \$1.25, and oats at .95c. By shipping your grain to us you can obtain a substantial advance, and can then hold for a favorable market. Winnipeg, August 15, 1923.

RUSSO-CHINESE WAR SITUATION BECOMING GRAVE

Shanghai.—The Nationalist Government semi-official Tachung News Agency issued a despatch under a Harbin date line, saying "although no major developments have taken place on the Manchurian frontier during the past two days, both China and Russia are quietly preparing for war."

The Chinese authorities declared martial law throughout the entire length of the Chinese Eastern Railway as the result of the "increasing gravity of the situation as well as because of a number of incidents along the railway such as the derailing of trains as well as the recurrence of sabotage by both Russians and the Chinese Communists."

The despatch added that the Kirin provincial government had ordered two artillery brigades to proceed to the eastern border of Kirin province to oppose alleged raids by Russian troops. Telephone communications from Harbin to the east have been interrupted and Communist agitators are believed guilty.

A military communique considered to have an ominous aspect, was issued by the semi-official news agency Tachung, stating: "Reliable circles indicate that the Manchurian situation may be expected soon to assume a different aspect inasmuch as the Soviet military demands have failed to produce the desired effect."

The official Nationalist News Agency has issued a bulletin under a Mukden date, saying:

"It is learned that some Japanese military officers were found within the Soviet army. It is reported that the Soviet and Japan have entered an agreement whereby Japan promised to assist Russia, the latter promising to give up fishing rights in North Saghalien in favor of Japan. In addition it is believed that Japan is strongly opposed to the powers' intervention in the Sino-Russian crisis which move the United States is believed to have attempted."

Few Harvesters From Coast

Less Than Five Hundred Have Left Vancouver This Season

Vancouver.—With a lighter crop and new labor-saving machinery in use on the prairies, only 422 harvest laborers have left Vancouver on the harvest excursions so far this season, it is announced by J. P. McVety, superintendent of employment. In addition 125 have gone from New Westminster and some from other centres. So far only those with jobs guaranteed have been granted the \$10 rate, but as the extent of the harvesting operation grows a few others will be allowed to take their chance of employment.

Buys Canadian Cars

Australia Good Customer But Buys Cycles From England

Canberra, Australia.—Out of 100,000 complete motor cars imported to Australia in the 12 months ending June 30, 66 per cent. were from the United States, 23 per cent. Canadian, and the remaining 11 per cent. English.

The scales were turned when it came to motor-cycles, however, for more than 80 per cent. of the motor-cycles imported in the 12 months came from Great Britain.

Resigns Post

Saskatoon, Sask.—Forced by ill-health to return to his old home at Blyth, Ont., Frank Metcalf, Dominion fruit inspector in Saskatchewan for 18 years, is being succeeded here by J. G. de Jong, of Winnipeg. Mr. Metcalf was presented with an address and purse of gold by fruit men of the city.

Prepare To Evacuate Rhineland

Brussels.—Belgian troops are preparing for evacuation of the second Rhineland zone on September 15, as an outgrowth of The Hague conference, and as a token of the conciliatory spirit of Belgium toward Germany.

Britain and France Sure To Co-Operate

Reparations Problems Will Not Affect Friendship says Hon. Jean Knight

Vancouver.—Problems resulting from the failure of Germany to meet her reparations payments to those countries which suffered great losses as a result of the World War, will be settled so far as Britain and France are concerned, in a spirit of understanding and co-operation, declared Hon. Jean Knight, first minister of France to Canada, when he addressed a luncheon meeting of the Canadian Club here.

The guest of honor said that although reparations problems offered great difficulties to the nations affected directly by these payments, he was sure that the friendly co-operation of Britain and France would continue.

"Equity and justice based on a thorough understanding will mark the settlement," he declared.

Making Attempt To Overtake Zeppelin

French Air Ace Has Ambition To Beat Dirigible To Lakehurst

Le Bourget, France.—Dieudonne Coste, French air ace, has started on a flight around the world in pursuit of the German dirigible Graf Zeppelin, which he hoped to overtake and pass before she could reach Lakehurst, N.J., and New York.

The French aviator, who has already made a flight around the world since he crossed the south Atlantic ocean in 1927, told an intimate friend that he would attempt to break the world's non-stop distance record for aeroplanes on the first stage of his race around the world with the Zeppelin.

Facing Grain Shortage

Russia Will Have To Import Wheat Says Soviet Official

London, England.—A wheat shortage in Russia was indicated today in an Exchange Telegraph despatch from Moscow, via Riga.

The despatch said that Michael Kalinin, president of the Soviet Central Executive Committee, despite his previous prediction that the Soviet harvest would be 5,000,000 tons greater than in 1928, was now reported to have said that Russia must import 50,000,000 roubles worth of grain or force the peasants to work harder.

The situation was declared to be precarious, because of a prolonged drought in the south Ukraine, Volga and Caucasus regions.

Ottawa Will Purchase Serum From Winnipeg

Many Cases Of Infantile Paralysis Make Action Necessary

Ottawa.—Mayor Arthur Ellis, of Ottawa, has given authority for the purchase of serum valued at \$500 from Winnipeg for the treatment of infantile paralysis cases in the city. Mayor Ellis' action came following an interview with Dr. W. T. Shirreff, acting medical officer of the city, at which the health official recommended the purchase owing to the difficulty of obtaining the serum locally.

The number of cases reported in Ottawa to date, is 19, which is regarded as an abnormal situation.

To Test Dirigibles

London, England.—The British dirigibles R-100 and R-101 will be given shed trials during this week. It is expected the R-100 will be launched and taken to Bedford within a month, while the R-101 probably will be launched late in September. One of the dirigibles is to make a flight to Canada and the other to India.

Floods Destroy Persian Town

Teheran, Persia.—A flood which drowned 100 persons and destroyed 5,000 houses, was reported from Tabriz. The custom house with 3,200 bales of merchandise was damaged and streets washed out in places to a depth of nine feet. The government has authorized immediate expenditure of \$1,000 for the erection of levees.

SERVING AT THE HAGUE

Hon. P. C. Larkin, Canada's high commissioner in London, who was appointed to represent Canada at the reparations conference, at The Hague.

Clips Four Hours Off Record

But "Mauretania" Two Hours Longer Than Bremen On Eastward Crossing

Plymouth, Eng.—The Cunard liner "Mauretania," recently deposed by the North German Lloyd liner "Bremen" as the speed queen of the seas, arrived here from New York on her first eastward crossing since she was overhauled in an attempt to crack the "Bremen's" new record.

The "Mauretania" made the eastward crossing in 4 days, 17 hours, 49 minutes, beating her old record by four hours, but failing by two hours to make the time which the "Bremen" made on her first eastward crossing. The "Mauretania" averaged 27.22 knots.

Four Drowned At Stettler

Boat Upset In Buffalo Lake When Storm Broke

Stettler, Alberta.—Hurled into the choppy waters of Buffalo Lake, when a storm broke, two men and two boys were drowned, and another rescued when the small boat to which he was clinging was blown to shore.

The dead are: W. J. Burrell, of Hanna and his two sons, Ernest, aged 10 years, and John, aged 12 years, and Sidney Steele, also of Hanna. The lad rescued was Harold Burrell, aged 16 years, also a son of W. J. Burrell.

Minister's Daughter Fined

London, England.—Miss Dorothy Thomas, youngest daughter of Rt. Hon. J. G. Thomas, was fined ten shillings in London for causing obstruction by leaving her automobile in St. Paul's Churchyard.

Americans Show Real Friendship

Help Fight Stubborn Fire On Canadian Farm Near Border

North Portal, Sask.—Fire supposedly starting from a strawstack on the Franke farm, seven miles northwest of North Portal, spread to the prairie grass and threatened the crops and buildings on this and surrounding farms. Fire fighters were soon on hand and worked into the night getting it under control, but it again broke out and a general alarm was sent out by phone and by the blowing of the fire whistle in Portal, N.D.

Citizens, railway employees, customs and immigration officers from both sides of the boundary, headed by Sergt. Bradley, R.C.M.P., turned out in full force, leaving the towns almost deserted, and joined with the farmers making an army of 300 men who fought the flames for five hours, and by backfiring and plowing of fire guards prevented loss of crops and buildings except an old barn on the Almond farm. One of the fire-engines from Portal, N.D., was run out to the John Waddington farm in case it might be of use in protecting the farm buildings. The fine spirit shown by the citizens from the U.S. side in helping out the Canadian farmers is highly commended and much appreciated. The dry prairie and the high wind made this one of the most dangerous fires ever known in this district.

Resigns His Position

Hon. C. M. Hamilton Succeeded By Hon. George Spence

Regina.—Resignation of Hon. C. M. Hamilton, minister of agriculture for the province of Saskatchewan, was received by Premier Gardiner, to take effect immediately. Mr. Hamilton has gone to the Head of the Lakes on work regarding his appointment to the Board of Grain Commissioners of Canada.

Hon. George Spence becomes minister of agriculture, according to the announcement made this morning by Premier Gardiner.

Georges Clemenceau Ill

Paris.—Georges Clemenceau, the aged war-time premier of France was taken suddenly ill at his cottage at Les Sables d'Olonne, on the Bay of Biscay, in Vendee. A doctor summoned from Paris, said, "The Tiger" was over fatigued from writing a book on the war and advised a complete rest. Clemenceau is 88.

Will Visit U.S. Soon

Washington.—Reliable information here says that Ramsay MacDonald, British premier, will sail to U.S. within six weeks.

VARIOUS REASONS ARE GIVEN FOR GRAIN TIE-UP

Montreal.—Wariness of the European buyer; consumption of home-grown wheat in many European countries; the price of Canadian wheat and just "market conditions" were various reasons ascribed in different quarters to the tie-up of Canadian wheat in Montreal and other eastern points.

Whatever the cause, there are 120 inland ships laid up in the ports between the lakes and the Atlantic and some 1,800 Canadian sailors, it is estimated, are idle; the bins of elevators here are practically full and there is no indication of a break.

While the large steamship concerns are feeling the pinch keenly, with probably half of their ships standing idle, the lot of the small owner, of the man with one or two ships, is even more serious.

The new crop will be on the move very shortly, but marketing conditions are unsatisfactory. Local dealers report both the United States and the Argentine as underselling Canada and, while the European buyer must have a certain amount of Canadian grain, he is buying a minimum in the face of this competition, it is stated here.

Canadian seamen, out of employment through the tie-up, are going to the United States in search of employment, declared J. H. Pare, president of the Canadian Seamen's Association.

The present hold-up of grain in the port of Montreal is wholly a question of price. The time will come when either we shall have to meet the view of the European buyer on price, or he will have to meet ours. In the meantime, our products are not moving, said Frederick Heywood, export manager for James Richardson and Sons, Limited. He held that Canadian prices were wholly a matter of market conditions and did not hold the Canadian wheat pool to blame.

Trying To Escape Penalty

Graf Zeppelin Stowaway Jumps From Steamer But Was Recaptured

Hamburg, Germany.—Albert Buschko found it easier to stow away on the Graf Zeppelin for his last flight to Lakehurst than he is now finding it to escape the penalty. He jumped overboard from the steamship "Thuringia" as it entered this port but was soon fished out by a passing lighter and was locked up again on the liner. His stepfather was waiting for him here but was not allowed to take Buschko until the courts have dealt with him.

Assembling Large Seaplane

Buffalo Concern Plans To Use It On Great Lakes

Philadelphia.—A seaplane capable of carrying 50 persons, believed to be the largest in America, is being assembled at the Philadelphia navy yard. It is destined for operation on the great lakes by a Buffalo concern.

It will carry 39 passengers and a crew of 20. It has a wing spread of approximately 94 feet, four air-cooled motors of 450-horsepower each, and gasoline capacity of 10,000 gallons.

Speeding Up Mail Delivery

New York, N.Y.—Catapulted from the deck of the North German Lloyd liner "Bremen" at 6 p.m., while 200 miles from shore, the seaplane New York, brought five sacks of mail to the liner's Brooklyn pier at 7:50 o'clock. This speeded the delivery of the 2,000 letters and post cards up about six hours.

Had To Cancel Engagement

Calgary.—Stricken with illness upon his arrival in Calgary, the Right Hon. Lord Hanworth, P.C., K.B.E., master of the rolls, of London, Eng., who was to have addressed the Calgary Bar Association at luncheon, was obliged to ask that the engagement be cancelled.

Almost one-third of Canada's population is of French origin.

PRINCESS MARY'S ELDEST SON

Hon. George Lascelles, older of two sons of Princess Mary, who is said to resemble his mother very little, but to be the proverbial dead image of his dad, Viscount Lascelles.

THE SCHOOL FAIR

One week from today the school
fair will be held in Carbon and it is
time for those who have articles to
exhibit to get them ready. Every child
in the schools of Carbon and district
should endeavor to put in as many
exhibits as they can in order that
their particular school or room will
have a chance to win the cup present-
ed for annual competition by the Car-
bon Elks Lodge last year. The exhib-
its will not be up to the standard of
other years in the garden products,
but this should not stop anyone from
exhibiting. Bring in the best you
have and no doubt you will stand a
chance of winning some points for
your school. If you do not know what
to exhibit in the various sections,
consult your teacher or officials of
the school fair at once and prepare
for those articles which you have. It
is a handicap to exhibitors to have no
prize list to go by, but we hope for
their sake that the school fair com-
mittee will see fit early in the spring
to issue a local prize list in order that
every pupil will know just what he or
she has to prepare in the garden prod-
ucts, live stock, art and other sec-
tions. This will greatly help to build
up a strong school fair and create a
greater interest to outside schools, by
giving them a guide to go by.

The school fair is a great benefit to
every student because it creates com-
petition and by so doing also creates
a greater desire to do work better and
with more care than would otherwise
be the case. And this training in it-
self will help the student along from
one grade to another and as he or she
advances in the work they will not
only think of the competition in the
garden products and other things that
they exhibit in the school fair, but in
the higher mathematics, literature and
other subjects and it will be their
earnest desire to conquer these sub-
jects that will build them up to be of
sound mind and to become better fit-
ted for the future citizens of our town
and province.

JOY IN WORK

An honest man is entitled to hap-
piness in his work. It is the one sure
sign that he has found his true voca-
tion. He greets his work each day
with a singing heart and loves his
business. Love is the greatest thing in
the world and love for one's business
is as natural as love for one's family.
Indeed, love is the great partner of
success in life. There can be no joy
without it.

The morning tells an intelligent
man more things. Generally, it rules
the day. If it starts wrong with him
the day is spoiled. A dislike, on the
part of a healthy man, for beginning
the work of the day, is usually an in-
dication he is not in the right place.
If enthusiasm does not come in the
morning to the business man he may
be sure something is radically wrong,
whether with his habits, his health or
his occupation.

When one wakes in the morning
with regret that he must get up and
go to work, he may well understand

that a vital necessity of success and
happiness is not his, and that it is
high time for him to make a change
in something—in his diet, his conduct
or his vocation—for he is certainly
not on the straight road to prosperity
and achievement.

Where there is love there is a fair
chance of success, because love cre-
ates eagerness to do and work and
think for the thing loved in order that
it may prosper. Those in a job only
for the pay envelope, get only that
out of their work. The pleasure they
derive from the money is short-lived
and is seldom renewed by salary in-
creases. Employers do not reward
with higher pay those who work only
for the love of money.—Ex.

DISPLAY TOWN NAMES

Alberta towns on main or secondary
highways might well adopt a plan of
having the name of the community
displayed on board or electric signs.
While some have such signs, they are
scant in number and should be aug-
mented by others in all parts of the
province.

During the trip to Lethbridge a few
days ago, motorists found that such
names of towns were singularly lack-
ing. Some who arrived late at night
had to drive round and make enquir-
ies as to the name of the place, in or-
der to make sure that the right road
was being followed.

Councils might well arrange for
signs to be erected on the main roads
on each side of the town, giving the
community some useful publicity and
at the same time providing a service
that would be useful to motorists.—
Good Roads Magazine.

Here and There

(354)
The ancient art of goat-getting
is in full swing at Banff with 25
wild Rocky Mountain goats trapped
in June and nearly the same num-
ber in July. They are enticed
into traps by salt licks of which
they are inordinately fond. Some
are to add to the wild life of Cali-
fornia; others are for exhibition
purposes and for zoos.

Concrete work on the new Saint
John elevator has commenced and
will require about 25,000 cubic
yards of concrete. Grain business
through Maritime Provinces ports
is growing largely every year.

Statistics gathered by the New
Brunswick Government Bureau of
Information and Tourist Travel
show an increase of 25 per cent. in
the number of motor tourists from
the United States entering Canada
at border points of this Province
for vacations.

Word has been received by J. M.
Gibbon, general publicity agent,
Canadian Pacific Railway, that His
Excellency the Governor-General of
Canada will extend his patronage
to the Canadian Pacific series of
six concert tours of British and
Canadian music to be given across
Canada, commencing in the fall of
this year and continuing until the
spring of 1930.

Products of the fisheries of Cana-
da in 1928 had a total value of
\$54,971,319, an increase of \$5,474,-
281 compared with 1927. These
figures comprise the value as mar-
keted, whether sold for consump-
tion fresh or canned, cured or other-
wise prepared. The salmon
fishery is the most important, with
a total value in 1928 of \$17,867,053.

The Canadian Women's Press
Club, consisting of 160 delegates
came by Dominion Atlantic Rail-
way special to Digby recently,
stopping at Annapolis Royal and
Grand Pre en route. A number of
outstanding writers were in the
party and all expressed their ad-
miration of the Evangeline Country
and the Annapolis Valley.

A notable beauty spot is being
recalled to public notice this sum-
mer by the Alpine Club of Canada
which is holding its annual camp
from July 15 to July 31 on the site
of the old railway village of Rogers
Pass near Glacier, B.C., at the west-
ern opening of the Connaught Tun-
nel on the main line of the Cana-
dian Pacific Railway. The camp
commands a magnificent view em-
bracing Mount Sir Donald, Mounts
Macdonald and Tupper, the Ille-
cillewaet Glacier and many other
fine ranges and valleys.

On the first anniversary of their
wedding, Mr. and Mrs. Cornelius
Vanderbilt, Jr., recently left the
Banff Springs Hotel in the Cana-
dian Rockies for a motor trip
through western Canada. He was
most enthusiastic about the roads,
scenery and accommodation in the
Rockies.

LIFE'S TOOLS

When a carpenter goes out to build
a house, he first examines his tools
to see that they are in perfect condi-
tion. A good workman will not work
with damaged tools, nor with an es-
sential tool missing. The finished re-
sult would be imperfect. He would not
have his name associated with such.

Are parents as careful as the good
workman. So many small children are
to begin next month to build the founda-
tion for the future structure of their
lives. Are their tools in perfect work-
ing order? Eyes and ears, heart and
lungs—in fact, the whole structure
that makes up the little body. Unless
they are in perfect working order, the
child starts with a handicap that no-
thing in later life can overcome. The
structure that he builds will be im-
perfect and he is not responsible—
his parents are!

No child should start school with-
out a complete physical examination,
without having defects, if any, reme-
died, without being in perfect work-
ing condition. That is his birthright.—

"In Selling Position"

Alberta Wheat Pool members should appreciate what
it means to the Central Selling Agency to have Pool
wheat in "a selling Position."

To make the best sales Pool wheat should be in a
position where it is instantly available, and where long
and troublesome delays are not incurred.

When Pool wheat is in Pool elevators the Selling
Agency can depend upon it being directed wherever it is
wanted. For that reason, if for no other, Pool wheat
should be delivered to Pool elevators.

Besides this, Pool elevators give Pool members an
assurance of fair treatment to an extent never known in
the days when there was no Wheat Pool.

You can best aid your Selling Agency and your own
elevator system by delivering your wheat to Pool elevators.

FLY-- AVIATION IS GROWING

The biggest opportunity of the century awaits those who

"Worth making a noise about"

DON'T SPEND YOUR MONEY OUT OF TOWN!

It looks like a hard year for everyone and the
people of Carbon and district would be well ad-
vised to spend their cash here this year instead of
sending it to the mail order houses. If you do this
the whole district will prosper and the merchants
will not be unwilling to extend some credit in the
spring to their cash customers. On the other hand,
if you send your cash to the mail order houses and
in the spring when you need the credit, you will
have only yourself to blame if the merchant refuses.
His credit will be limited this season and he will
direct it where it will bring cash returns.

CAUSE IT WILL COME BACK TO YOU

Snicklefritz -----

"Why does a young man embracing his girl at the garden gate, just as the old man approaches, remind you of a love scene at the theatre?" "Because he is hugging his girl before the foot lights."

At first a girl wants nothing but a husband. After she gets him she wants the earth.

"Young man, didn't you think of the future when you embezzled that money?"

"Yes, I put it straight in the Savings Bank."

It is sad to see the family relics sold at auction, but the most painful thing under the hammer is generally your thumb-nail.

A plumber's helper—forever below zero.

A popular noosepaper—the marriage certificate.

A physician has discovered that the call of a rattlesnake will cure its bite. Pity the same thing isn't true of a book agent.

Visitor: What is your new brother's name?

Ethel: I don't know. We can't understand a word he says.

"Yesterday," said Jones, "I refused a poor woman a request for a small sum of money, and in consequence I passed a sleepless night. The tones of her voice kept ringing in my ears the whole time."

"Your softness of heart does you credit," said Brown. "Who was the woman?"

"My Wife."

Farmer: "I say, Georgie, ye didn't tell me the horse ye sold me last week was blind o' an e'e."

Georgie: "The man I bought it of said naething about it, so I thoct it was a secret."

Ellen: "Trust her! You surely don't think she could keep a secret."

Matilda: "Well, I've trusted her with other things and she kept them."

Small sister: Let's play that we are married.

Small Brother: Naw—let's play foot ball and then we won't get banged up so much.

FINDS ALBERTA ROADS BETTER THAN B. C. SYSTEM

Alberta clearly leads its sister province of British Columbia in highway building, in the opinion of J.W. Glenwright, vice-president of the Edmonton branch of the Alberta Motor Association. He recently returned from a tour of the southern districts of the two provinces and found that the coast province was certainly lagging behind when it came to road building.

On this trip Mr. Glenwright travelled by way of the Crows Nest Pass, returning over the Windermere highway. He found the roads in southern Alberta absolutely first-class, and regretted that British Columbia, at least the sections he drove over, was far behind in that respect.

"In southern British Columbia the roads had not been properly built, as they were narrow and dangerous and apparently little attention had been given to proper maintenance," said Mr. Glenwright. "There were deep ruts, especially between Cranbrook and Kuskanook, at which point one takes the boat for Nelson."

"On our Alberta roads the great danger is loose gravel. From Red Deer to Edmonton it did not appear that the road was being properly main-

tained, as there were some bad holes encountered. It is apparent that a policy of continuous maintenance must be adopted to give the service demanded by the auto traffic of today."

TOURISTS FROM U.S. MAY RETURN WITH GOODS WORTH \$100

Removal of vexatious restrictions on tourists has long been urged at conventions of the Alberta Motor Association. It has been shown that this country is desirous of making a strong appeal to motorists from south of the border, this being the country to which a large percentage of them intend to drive for holiday jaunts.

There is therefore satisfaction among those promoting the work of the A.M.A. over the recent announcement from Washington that tourists will have no trouble taking purchases back to their own country so long as they follow instructions.

Writing from the U.S. capital to the Ontario Motor League, F. A. Weber, U.S. Commissioner of Customs, stated that the provisions still remain which allow tourists to bring back from Canada souvenirs of their visit in the shape of wearing apparel, table linen, pictures, books, musical instruments, piped cutlery, chinaware, stationery and "bric-a-brac" up to \$100 in value free of duty. This definite ruling was obtained as the U.S. bureau had ruled in a recent case that a desk brought in from abroad was not entitled to free entry. His reply shows that the old ruling in respect to tourists visiting Canada still stands, despite the recent decision.

HE WHO PLANTS A ROSE

He who plants a rose plants Beauty; He who waters it until it grows A radiant, throbbing thing of poignant glory.

Serves mankind—Oh, much better than he knows.

He who plants a rose plants Splendor; Breathless rapture flung across the sod.

A light to shake the soul and lift the spirit

Up to the high white citadel of God. He who plants a rose plants Triumph; Mastering the brown, reluctant soil, He lifts at last a brave bright showing Of Beauty, Splendor, Triumph, for his toil.

Fond Parent: What's the matter, dear?

Daughter: Freddie and I have parted forever.

"Um! In that case I suppose he will not be around for a couple of nights."

Locomotive Number 5900, one of a fleet of twenty monster oil-burning engines for use by the Canadian Pacific Railway on passenger and freight service in the mountains of British Columbia, has been released from the Montreal Locomotive Works and was on display in the Windsor Street Station, Montreal, recently. It was viewed by a constant stream of spectators all day, who admired its 98 feet of length, its huge proportions and its generally handsome appearance. This locomotive is the greatest in the British Empire.

The total number of dairy factories in operation last year in Canada was 2,885, comprising 1,265 creameries, 1,303 cheese factories, 288 combined butter and cheese factories, and 29 condenseries.

The Royal York Hotel, Toronto, was a blaze of color at the recent rose show held there in July. The blooms ranged from the pure white of large dimensions and the smaller varieties to the vivid red of American Beauties and others. The ball room of the Royal York was filled with them at the Ontario Rose Society show. The display gave birth to the project of having the most beautiful rose garden in the world laid out on the Canadian-American border and a committee was appointed to consider the plan and to settle final details at a meeting at the Royal York next month.

Announcement has been made that Americans and Canadians will join in travelling to the World's Poultry Congress to be held in England in 1930. Delegates will meet at Montreal and will travel via St. Lawrence route overseas. It is expected that nearly 1,000 delegates will make the trip.

Canada's wool crop, like the grain harvest, moves across the country in a great wave, not being a simultaneous operation in all provinces. It begins in the sheltered valleys of British Columbia and moves steadily across the Prairies. The shearing is at its height early in June and is about completed by the end of that month. The crop ranges from 15 to 24 million lbs. yearly and is marketed largely through the Canadian Co-operative Wool Growers.

Canadian Pacific farm sheep swept the board at the Edmonton show recently with three champions including the any age Suffolk ram and ewe. Other wins including nineteen first were credited to the Experimental Farm at Strathmore, operated by the Canadian Pacific Railway.

Church At Jasper Is Soldier's Monument

Gift Of English Lady In Memory Of Her Son

Unique among the churches of Canada is the little church of St. Mary and St. George, of Jasper, which was consecrated recently by the Bishop of Edmonton. The building, a beautiful structure of stone and stucco, with a tiled roof, was built at a cost of \$17,000 from a design by A. H. Calderon, of Edmonton, and is a gift to the parish from a lady in England, who wishes her name to remain anonymous.

It was presented in memory of her son who was killed in war, and beneath the corner stone, which was laid last year by His Excellency The Governor-General, lies the testament which was found on the young man's body when he was carried out of "No Man's Land." The furnishings and fittings of the church were also the gift of the unknown donor, while the bell was presented by Viscount Willingdon.

SUNDAY SCHOOL LESSON

SEPTEMBER 1

EZRA'S RETURN TO JERUSALEM

Golden Text: "The hand of our God is upon all them that seek Him, for good."—Ezra 8:22.

Lesson: Ezra 7:1 to 8:36.

Devotional Reading: Psalm 63:1-8.

Explanations and Comments

With the Permission Of Artaxerxes, Ezra Goes To Jerusalem, 7:6-10.—Ezra was a descendant of Seraiah, the chief priest during the reign of the last King of Judah, and traced his ancestry back to Aaron. He was "a ready scribe of the law which the Lord God of Israel had given." He studied the law, and not only copied it but interpreted it. He requested permission from King Artaxerxes to go to Jerusalem, and this the king readily granted. With a company of Jews who wished to settle in Judea, and with priests, scribes and singers for the temple service, porters to keep the temple gates (1 Ch. 9:17), and Nethinim, servants for the temple (1 Ch. 9:2), he left Babylon the first month (Nisan, March-April), of the seventh year of King Artaxerxes, and reached there in the fifth month (Ab, July-August), after a journey of nearly four months. His purpose in going to Jerusalem was to teach the statutes and ordinances of the law to the people there. As for himself, he had "set his heart to seek the law of Jehovah," and what was more, "to do it."

Between the knowing what should be done and the doing of it there is, alas! too often a gulf never bridged. Mere knowing about others' needs or mere expression of regret at their needs does not avail; the true philanthropist is one who knows and sympathizes and does, "Do the good you meditate," in the words of Horace Bushnell, "or if you never find the time for doing it, have the frankness to confess that your good intentions are hollow and worthless."

The One Volume Commentary states that the Jews who remained in Babylon, and who were surrounded by a population wholly heathen, were marked off from their neighbors by a much deeper line of cleavage than were the Jews of Palestine, and a higher standard of religious devotion prevailed among them; consequently, when the religious laxity of the people of Jerusalem became known at Babylon, Ezra was sent to inquire into it (verse 14), to introduce reforms, and, by authority of the Persian king, to enforce the observance of the Law by means of penalties (verse 26). Artaxerxes not only granted Ezra's request, but also gave him much gold and silver for the temple, and also a letter in which he directed his officers in Judea to do whatever Ezra might ask. "Blessed be Jehovah, the God of our fathers," exclaimed Ezra, "who hath put such a thing as this in the king's heart, to beautify the house of Jehovah; and hath extended lovingkindness unto me."

Muscular Rheumatism Subdued.

When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

The museum of the American Indian, in New York, grew out of the purchase by George G. Heye of a Navajo Indian shirt.

If one be troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

Why don't you marry Helen? Are you afraid to pop the question? No; afraid to question the pop.

Minard's Liniment for Summer Colds.

AN OUTSTANDING EXHIBIT

In his address before the Rotary Club, during the Calgary Exhibition and Stampede, Hon. J. D. McGregor, Lieutenant-Governor of Manitoba, for many years Canada's most outstanding live-stock man, referred especially to the demonstration put on by the C.P.R. Supply Farm, of Strathmore, which emphasized productive possibilities of good dairy cows. Mr. McGregor said that he considered it to be the best, from an educational point of view, he had ever seen at any live-stock show.

As shown in the accompanying photograph, five cows of various ages were used to emphasize that high production increases profits. Two mature cows and one four-year-old heifer, one three-year-old heifer, and one two-year-old heifer were included in the group. Each of these had finished an official record within five months, and their total production for 365 days was 127,583 lbs. of milk. The first cow to the left, "Strathmore Sylvia-89340," by producing 29,371 lbs. of milk was recognized to be the highest milk producer in Canada to finish an official yearly record during the past year and a half. The second cow, "Belvedere de Kol Ruby-82,632," finished on June 14th, with

27,892 lbs. of milk, and immediately was shipped to Brandon, where she won second prize in very strong competition. Her yearling heifer was first at Brandon, Calgary, Edmonton, Saskatoon and Regina exhibitions, and was Junior Champion at Calgary and Regina.

The next is "Valley Farm Francy Segis-154139." She produced 22,922 lbs. of milk, and 930 lbs. of butter, which is 2,357 lbs. of milk and 22.5 lbs. of butter more than the best two-year-old record reported in Canada in 1928.

The four-year-old next in line Strathmore Texaline Sylvia-111946," produced 23,830 lbs. of milk and 1,052 lbs. of butter; while the one on the right "Strathmore Lassie Sylvia-130501," as a three-year-old produced 23,568 lbs. of milk and 958 lbs. of butter.

According to the Dairy Commissioner of the Province of Alberta, the average dairy cow in that province produces 3,950 lbs. of 4 per cent. milk. These five cows produced as much as 32 average Alberta dairy cows. Their milk, sold to the Union Milk Co., Calgary, at regular Dairymen's prices, brought \$3,214.10, or an average of \$642.82 per cow. This

revenue returned more than \$475.00 per cow above feed costs.

The milk cans in the picture were used to illustrate the amount of milk produced in one year by Strathmore Sylvia. About one-sixth of the cans are visible in this picture. Altogether there were 479 cans—representing a production of 2,937 gallons of milk.

This exhibit attracted a constant stream of visitors who spent a good deal of time studying the material attractively displayed on show cards.

There are approximately 600 pure-bred Holsteins in the famous herd at Strathmore, Alberta. The show herd of 15 head won 100 first prizes at eight major exhibitions in 1928. Under the advanced registry system of the Holstein-Friesian Association of Canada, there are 40 Gold Medal and 73 Excellent cows in this herd. This is the largest number of Gold Medals in any herd in the world.

Some very distinguished visitors happened to come along just as this photograph was about to be taken. The two ladies are Dowager Lady Pentland and her daughter, Hon. Miss Sinclair. The gentlemen are Lord Pentland and, on the left, George H. Jones, manager of the Strathmore Farm.

Development Of Peace River

Country Has Gone Ahead Rapidly In Last Few Years

The first shipment of grain out of the Peace River District, was made up of three cars of wheat hauled by team 85 miles from Vanreina to Reno. There were no highways or telephones, and only two small rural schools then. Today, there are 1,650,000 acres under cultivation, with a prospective crop of 15,000,000 bushels. Population has increased from 3,900 to 50,000; there are schools, churches, flourishing stores, elevators, electric light plants, highways and telephones.

Snow Houses a Myth

Few Eskimos Have Ever Seen Or Heard Of One

Eskimos are frequently seen sweating under a powerful sun. The general idea of Eskimos and all inhabitants of the Arctic Circle is that they live in conditions of eternal winter. Quite wrong Mr. Stefansson, the Arctic explorer, has been telling a Cambridge audience. The wildflowers of the Arctic are exquisite, he says, and very few Eskimos have ever seen a snow house—or heard of one except at school!

Too upliss—the highbrow.

Test For Your Eyes

Normal Vision Sees Objects Clearly Fifty Yards Away

Are you good at judging distances? It is said if you have normal eyesight you should be able to see a man's eyes at fifty yards; at one hundred yards you may see the buttons on his coat; and at three hundred yards you may just see his face; while the color of his clothes can be distinguished at four hundred yards. Of course, on a clear day, things look nearer than when the day is cloudy.

Light and airy—the flighty blonde.

WORLD HAPPENINGS BRIEFLY TOLD

Canada was the principal country with which the United States traded in June, leading all the other countries in both exports and imports.

Erich Remarque, author of "All Quiet on the Western Front," may be the recipient of the next Nobel prize for literature, it was reported from Stockholm.

The British Columbia Government recently announced the distribution of liquor profits amounting to \$682,919.48 covering the six-months' period ended March 31.

The first repercussion of the small crop in western Canada was felt at Sarnia, when the John Gooding Thresher Company reduced its operating staff by one-third.

Hon. Audley Morrison, Chief Justice of British Columbia, was among those who received the degree of doctor of laws at the convocation exercises, at Dalhousie University, on August 26.

Closer co-operation in air transport matters throughout the world began between Great Britain and France, was discussed at a meeting of Lord Thomson and Laurent Eynac, respective Ministers for Air.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

Inside Information

Science has perfected a tiny camera that can be lowered into the human stomach to take sixteen pictures of the interior department from all angles. This is getting an inside view of the situation. Afterward the pictures may be enlarged.

Had Diarrhoea Bowels So Active Feared For His Life

Mrs. S. J. Jago, Canobie, N.B., writes: "My little boy, when three years old, had a severe attack of diarrhoea. The bowels were so active, and he vomited so much, I feared for his life. I tried many medicines, but he was always getting worse. A friend told me of

and after the second dose I saw an improvement. I gave him almost half a bottle and he was completely relieved.

"I have used it for the other children, and my husband and myself. My husband gives it great praise, and when he goes away from home to work he always takes a bottle with him."

WINDOLITE

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of ordinary glass weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, the singing waiter at Blackie Joe's New York night club, has written a love song to Molly Winton, but she treats him disdainfully because he is only a waiter. Finally he goes to the floor and renders the ballad himself, hoping to touch her heart. Marcus, the famous Broadway producer, is in the audience and offers to buy the song. Molly makes up to Al, so the latter insists that Marcus hire Molly to sing the number in one of his revues. Marcus agrees. Grace, the little cigarette girl, is heart-broken when she finds Al is leaving, for she is deeply in love with him. Al and Molly marry and both score successes on Broadway. Once Al visits his old friends at Blackie's and Grace is delighted to see him. Then he returns to Molly's dressing room in a Broadway theatre. She is with his friend, John Perry. Al does not see John surreptitiously press Molly's hand as all three leave together.

CHAPTER X.

They descended the elevator from the Manhattan Roof Theatre to the street, where Al looked around for a taxi. John Perry, following after, took Molly's arm, guiding her through the dense after-theatre crowds toward the curb.

Broadway was at its best—two wide currents of human beings moved compactly up and down beneath the brilliant canopy of lights from electric signs. There was romance in the crowds, and power, and feeling of dreams carried from the theatres that dotted the Street of Lights. There were shrill cries for taxis, the giggles of girls leaning on the arms of their escorts, the piercing whistle of the traffic cops stopping and starting the never-ending line of motor cars as the lights went from green to red, and back again. A happy, carefree spirit distinguished the crowd. But Molly turned bored eyes on this fantastic display of modern Babylon as she waited impatiently for the taxi.

"Why doesn't Al hurry and get one?" she inquired peevishly of John Perry.

"Steady, sister. He's doing the best he can," answered Perry.

But now a taxi driver saw Al's beckoning hand and swung up to the curb. They piled inside and the driver sped away toward the palatial skyscraper apartment in the fifties where Al and Molly lived. Molly snuggled down between the two men.

"Al," she remarked after a moment, "why do we always have to travel in taxis? Why can't we have a limousine and a chauffeur of our own. Everybody else does."

Al did not notice the complaining note in her voice. "I've been thinking that same thing—we can swing it easily now. Tomorrow you can pick one out. What kind?"

"I was thinking of a Rolls-Royce," said Molly eagerly.

Al hesitated and Perry gave a little laugh.

"Nothing cheap about Molly," said the racketeer.

"No, that's all right," interjected Al. "Whatever Molly wants she shall have. I feel I just can't do enough for her. Rolls-Royce it is."

They rode in silence until the taxi drew up before the apartment building that meant home to Al and Molly. As they stepped out Perry hung back, as though to say good-night. But Molly turned to him.

"No, John, I want you to come in."

"Of course," agreed Al. "What do you mean by backing out?"

So Perry laughingly acquiesced. Once more the rapidly rising elevator—a magnificently upholstered one this time—which carried them with amazing swiftness to the thirty-first floor. Al unlocked the apartment door and switched on the lights. A moment later Molly stood by the window, looking over the blazing lights of the city, glancing down at the specks on the sidewalks that were people. Her cheeks were hot for the moment and she threw open the window so that the crisp autumn night air fanned her face. Al had left the room. John Perry came and stood beside her, saying nothing, but regarding her with burning intensity.

Molly turned and answered his look with a wan smile. "No, John," she said quickly. "No, you don't understand."

"Understand what?"

"What I'm up against. It doesn't concern you. But . . . sometimes I feel I'd like to shoot myself."

She reached out her hand, gave his arm a convulsive squeeze, then dropped it quickly as she heard Al returning.

Al was the perfect host. He drew out a pack of cards, swung open a little drinking cabinet and poured Perry a drink. But when Molly saw the cards she expostulated.

"Al, darling, I don't feel like cards tonight. I'm awfully tired. Let's just talk. Or, rather, you two men talk and I'll listen."

So Molly listened, but Perry soon saw that she was out of sorts and seemed about to drop off to sleep. He courteously rose to go.

"Well, Al, I'll probably see you tomorrow over in Marcus's office."

He bowed himself out and Al faced Molly.

"Darling, are you ill? You're quite pale now; I have a strange feeling that something is wrong. You haven't been yourself lately."

Molly looked at him steadily, with a dark gleam in her blue eyes. Should she tell him?

"Yes, Al, something is the matter. I'm going to have a child."

She said it deliberately and her lip curled, plainly showing her irritation. But Al, unconscious of her reaction, came swiftly to her, his face radiant.

"Molly, that's—that's marvellous. A child—your child, my child!"

"Your child," Molly corrected him curtly.

"Why do you say that? It's as much yours as mine."

"I say it because I don't want it," Molly's attractive lips were set in a grim line.

"But why, Molly? You're only talking that way because you're tired. You've had to work too hard. Listen, little sweetheart, when it arrives you'll love it; we'll both love it. It's bound to mean the greatest happiness in the world to both of us. Don't you see that?"

"No, I don't. I see that it will ruin my career. I'll have to leave the show in a little while and while I'm gone Marcus will get a new ballad singer. People will forget me by the time I'm ready to come back. And how do I know Marcus will give me

back my job? I have the best spot in the show now. Your point of view is just plain selfish, because the whole thing doesn't affect you. But I see the other side."

Al stared at her bewilderedly for a moment. Then he said quietly:

"Molly, your nerves are on edge or you wouldn't talk that way. You don't have to be afraid—Marcus will always put you in as his headliner. He knows I wouldn't write another song for him if he didn't. But he wouldn't think of giving you the go-by, anyway. He knows what an attraction you are."

Al paused to regard Molly with a reassuring smile, but she did not see it. Her eyes were fixed sombrely upon the floor.

A helpless look passed across Al's face.

"As for my being selfish," he said humbly, "well, perhaps I am. But I don't mean to be. I simply adore you, Molly, and it would give me the greatest happiness I can think of for us to have a child. It would make all we have achieved seem worth while."

Molly rose wearily. "I'm going to bed."

Without kissing Al good night or even looking at him, she walked slowly toward her bedroom, her head dejectedly forward. He heard her bedroom door slam sharply.

Instead of going to his own room and undressing Al lit a cigarette and paced the floor. At first he was agitated and worried about Molly. But gradually he argued himself out of the disturbed state of mind. After all, it was natural that she should be upset. Perhaps the strain of her nightly performances was too much for her. In the morning this cloud would pass from her.

He finished his cigarette, put out the lights and went to the drawing room window, whence he could look out on the yellow glow from the city lights.

As he stood by the window, dreaming, meditating, already planning the future of the child that was to belong to him, he heard the tinkle of the phone in Molly's room. Her door must have opened for he heard Molly's faint voice:

"No, no. You mustn't call me." Before Molly hung up Al thought he caught the word "John." But no, he must have been mistaken. John Perry wouldn't be calling up at this hour.

(To be Continued.)

KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhoea, dysentery, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevent stomach and bowel troubles, or if trouble comes suddenly—as it generally does—the Tablets will bring the baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Making Long Trip

Party From Jasper Covering Historic Fur Trade Route In Specially Constructed Canoe

With a specially constructed canoe, "Curly" Phillips, well known guide of Jasper National Park, is taking a party of five Americans from the east on a thirteen hundred mile trip through the waterways of the north country, commencing at Summit Lake behind Prince George, B.C., and finishing at Waterways, Alberta, on the Athabaska River. The party will cover the historic route of the fur traders by which many of the early travellers into Western Canada, during the first half of the last century, reached the Pacific Ocean.

There are no railroads in the Kingdom of Afghanistan.

Little Helps For This Week

"Thy kingdom come."—Matthew vi. 10.

Thy kingdom come with power and grace
To every heart of man;
Thy peace, Thy joy, Thy righteousness,
In all our bosoms reign.

—Charles Wesley.

Thy kingdom of heaven is not come when God's will is our law; it is come when God's will is our will. While God's will is our law we are but a kind of noble slaves; when His will is our will we are free children.

Philomon had gone forth to see the world, and he had seen it; and he had learned that God's kingdom was not a kingdom of fanatics yelling for a doctrine, but of willing, living, obedient hearts.

—Charles Kingsley.

His Mistake

A fashionable city tailor had taken his daughter into partnership with high hopes of the future upon her graduation from college, but the situation was distinctly not so good. "I'm ruined!" he mourned. "What an idiot I was to let her go into business with me!"

"What's happened, old man?" asked a sympathetic friend.

"Why, the first thing she did was to change the name to 'Ye Olde Clothes Shop.'"

Might Congest Traffic

A western town is strong for safety first, having a bylaw which reads as follows: "When two cars come to a crossing both shall stop and neither shall start until the other is gone." If this is carefully observed, there will be few collisions, but some slight traffic congestion may result.

Minard's Liniment for aching joints.

A Valuable Seed Pod

Price Of Rare Orchid Is Estimated At \$150,000

Probably the most valuable flower seed pod in the world was recently on display at the Chelsea Flower Show, London, England. A single flower sprang from one of the seeds sold for more than \$1,500, and others sold for \$1,000. It is estimated that the entire pod with seed is worth \$150,000. The pod is the fertilization of a rare orchid, the Milonia Armstrongii.

A commercial fertilizer plant to cost \$7,000,000 is to be built at Trail, British Columbia.

Higher education in Canada is carried on in 23 universities and 85 colleges.

WORLD'S FAMOUS THREE FUEL HART PARR

In special tests conducted by nationally known engineers who used cheap distillate fuel the great Hart Parr 18-36 registered a draw bar pull of 5,535 pounds at 2 miles per hour and 4,075 pounds at 3 miles per hour, on the belt it easily pulled the amazing load of 43 horse power. The Hart Parr is a three fuel tractor and will burn gasoline, kerosene or distillate equally well. It is the one tractor that develops its power from the cheapest low grade fuel. Hart Parris are made for small, medium or large farms and have three forward speeds to speed up hauling and field work. Drive yourself and experience the thrill of controlling tremendous power.

MINISTER—REV. C. B. OAKLEY

WEEKLY CROP REPORT

(Issued by the Bank of Montreal)

General—In the Prairie Provinces grain cutting is general under favorable conditions. The yield will be considerably below average. In Quebec province good average crops are indicated with progress satisfactory and warm weather now needed to bring them to maturity. In Ontario harvesting conditions have been ideal and fall wheat is threshing from 30 to 35 bushels to the acre. In the Maritime provinces the weather is favoring crop growth and prospects are good. In British Columbia heavy rains have improved the situation generally, though too late to benefit grain crops.

Alberta, Western Area—In the northern section wheat is averaging about 15 bushels to the acre. In the centre rain has improved the feed situation, but only a small yield of wheat is expected. In the south the average yield on summerfallow is estimated at 25 bushels, with better grades than were expected. Pasture is good with plenty of winter feed, irrigated sugar beets and the second crop of irrigated alfalfa are good.

Northeastern Area—The indicated wheat yield on summerfallow is better than was anticipated and is now estimated to average 10 bushels. Oats are a poor crop.

Southeastern Area—50 per cent of the cutting has been done and wheat is ranging 7 to 15 bushels of No. 2 to No. 4 Northern.

Saskatchewan, Northern Area—Cutting is general under favorable conditions. The crop outlook in this area is somewhat better than in the south. Some damage by the sawfly is reported.

Southern Area—Except for occasional local showers the weather is clear. Rapid progress has been made with cutting and some threshing has been done. Yields will be much under average.

Manitoba—In favorable harvest weather wheat cutting is 75 per cent completed. Threshing has been started and will be general next week. The average yield on threshed areas is wheat 14 bushels to the acre, barley 18 bushels and oats poor.

price on butter scotch and pungent spice. "The catalogue I have," says he, "shows plainly Wilson's fleecing me. I'm through with him. I am, I vow; I'll send for goods, I'll say it now!" "Well, Honk," says I, "you have the right to run your business day or night. If you can really make it pay to quit this store and send away, I must admit that's up to you, no man can tell you what to do. But there's another side, my friend, to think about before you send, and that is this: don't be too sure that Wilson's crooked, simon pure. Please keep in mind his stock is small, some things 'turn over' not at all. He's forced to carry all the time some goods that do not yield a dime. He buys through channels ready made, from wholesale firms that must be paid; he pays their prices, has to friend, or lock his store at either end. No doubt at times he feels the same when he confronts the buying game as you feel when you buy from him—feels that his chance is mighty slim. Then Honk, I know quite well myself he's filled your larder from his shelf when you were stripped, plumb out of cash, his credit nearly went to smash one year because men 'on his books' were slow—or should I call them crooks? Quit if you wish at Wilson's store, that's your canoe and not my oar; do as you please, this land is free, and no one dares dictate to me—but if you quit, be kind my friend, don't 'send' with rancor when you 'send' for there's two sides to every deal, two sides to everything. I feel, two sides I know, to Wilson's price when he sells butter scotch and spice."

IN THE SHETLAND ISLANDS

Shetland women knit perennially. Whether they be driving home the cows, going to the store, looking after the children or doing the odd job, their knitting is always round around their waist. Their needles kept in a long case by their side, make unceasing music with their clicking.

Formerly rug making was a staple industry, the wool being woven on hand looms. Now women content themselves with preparing bright dyes for their wools from the various herbs and mosses which abound. Their last

wish is to extract money from you, and once they like you and begin to talk few can match them for kindness and hospitality. Since they are a democratic people, do not be surprised to find yourself sharing a meal of oat cakes and "saucer-meat," a species of highly seasoned sausage, with the shepherd or the chemist. It will be one that you will never regret, for at such a repast the conversation is often of a high intellectual standard.

The St. Paul Warehouse at St. Paul, Alberta, was broken into last week and a quantity of flour was stolen.

All wheat shipped from Bassano so far this year has graded No. 2 according to the Bassano Mail.

Two employees who have together completed over one hundred years in C. P. R. service were complimented by E. W. Beatty, chairman and president of the company, during his recent tour through the Maritime Provinces. They were Charles Henderson, who acted as conductor on the president's special and who started railway work in 1876, and Harry Saunders, engineer of the special, who has been in the company's service for 48 years.

Who Does Your
Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.
